

**Pennsylvania Republican Presidential Primary Poll
4/25/16**

Sponsor(s)	Fox 29 Philadelphia WTXF
Target Population	Pennsylvania; likely presidential primary voters; Republicans
Sampling Method	<p>Blended sample; mixed mode:</p> <p>Likely Republican primary voters were selected at random from a list of registered voters. Only voters determined likely to participate in the 2016 Pennsylvania Republican primary were included in the sample.</p> <p>Landline: registered voters were contacted on the evenings of April 22nd and April 24th, 2016 using an interactive voice response system.</p> <p>Mobile: registered voters were contacted on the evenings of April 22nd and April 24th, 2016 on their mobile devices. Respondents answered an identical survey in visual form.</p>
Weighting	<p>Two questions served as selection variables. The first question asked whether the respondent plans to vote in the primary on April 26th; all responses other than “definitely,” “considering,” or “voted absentee” were excluded from the dataset. Mobile respondents and respondents who are considering voting were then asked if they knew where their primary will be held (e.g. church, school); all responses of “I am unsure” were excluded from the dataset.</p> <p>The poll was weighted for age, race, gender, and region using propensity scores. Weighting benchmarks were determined using a calculation of historic primary voter turnout, external analysis, and internal projections.</p>
Total Number of Respondents	1050 (weighted)
Margin of Error	±3.0% (95% confidence)
