

**GA CD6 Special Election Poll  
6/16/2017**

<b>Sponsor(s)</b>	Fox 5 Atlanta
<b>Target Population</b>	Likely special runoff election voters; Georgia; Congressional District 6
<b>Sampling Method</b>	Blended sample; mixed mode  Contacted voters were selected randomly from a list of registered Georgia voters. Only voters determined likely to vote in the special election were selected to participate in the survey.  Landline: selected voters were contacted on June 14 <sup>th</sup> 2017 using an automated interactive voice response system.  Mobile: selected voters not available by landline telephone were contacted on June 14 <sup>th</sup> and 15 <sup>th</sup> 2017 on their mobile devices. Using voter data, selected voters were first matched to online and mobile application profiles electronically, using IP verification to ensure accurate selection and to prevent duplicate results. Selected voters were shown a brief message, push notification, or mobile advertisement requesting their participation in the survey. Respondents were offered a small, non-monetary prize for survey participation. Respondents answered a survey instrument identical to that of landline respondents in written form.
<b>Weighting</b>	The survey was weighted for age, race, gender, party identification, and county using propensity scores. Weighting benchmarks were determined using past voter turnout figures and internal projections.
<b>Total Number of Respondents</b>	537
<b>Margin of Error*</b>	± 4.2% (95% confidence)

\*The reported margin of sampling error is calculated using multiple assumptions that modern surveys rarely fit. The estimate assumes that, insofar as probability-based sampling is possible in real-world conditions, this model conforms to these parameters. Disregarding response rates, each individual within the studied population is equally likely to be selected for survey participation.
